# Printhead Cleaning Film

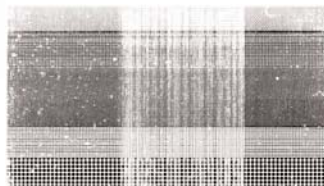

### Printhead Cleaning Film

is ideal for applications such as:

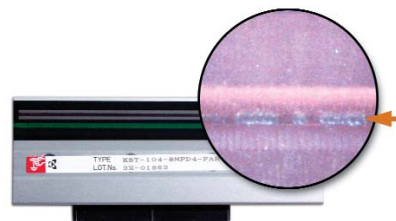

- Printing using resin based ribbons
- High-volume printing
- Harsh environmental conditions
- High resolution printing

Regular printhead cleanings are imperative for producing legible bar code labels and for ensuring the longevity of the printhead. A printhead that is not properly cleaned can collect a buildup of ribbon coating/adhesive that can have a negative effect on print quality. Datamax's new Printhead Cleaning Film contains no chemicals and is made up of a material that is strong enough to remove all of the unwanted buildup on the printhead surface. This new cleaning film is especially effective for those applications where a resin ribbon is used. The properties of the film effectively remove all of the harmful, hard to clean residue that a resin ribbon leaves behind.

#### Before:

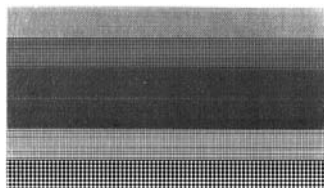

Printer test label showing signs of severe print quality degradation

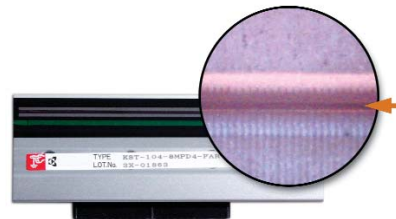

60X magnification shows heavy build-up of debris along the printhead burnline.

#### After:

After a single cleaning print quality has been fully restored

After cleaning 60X magnification reveals a clean burnline free of debris

Each cleaning film provides an exceptional value at 20 cleanings and is available in 4-inch, 6-inch and 8-inch sizes. Please contact Datamax Labels and Ribbons or Datamax Customer Service to place an order.

#### Part Numbers:

- 4-inch: DPO 70-2087-11
- 6-inch: DPO 70-2087-12
- 8-inch: DPO 70-2087-13
