Performance

Customer Information Systems & CMOS Camera

Shuttle SG-15

To be introduced in April 2005. Optional line or omni directional scanner. Very attractively priced. Small and sympathetic good looks.

Phoenix K-10

The terminal to offer more applications to mobile telephones. For mobile ticketing and couponing. Terminal comes with GPRS module and thermal printer.

Discovery SG-20

The success of this moment with large roll-outs going on for three years already and many years to come. Best looking product in the market is also the best performing product in the market today.

Xion X-9030

CMOS camera and OEM scanner. Reads 1D and 2D (data matrix) codes. Even from low density mobile telephone screens.

Eclipse K-1

The full size kiosk with 15" screens, optional touch technology and a beautiful design. A PC or DVD player can be integrated.

Explorer SG-30

Small kiosk housing with full kiosk applications. The SG-30 will be a wall mount terminal with color screen and various multi media applications. Introduction Q4 2005
