The H19 proves its success in the Postal industry

Opticon Sensors Europe B.V. would like to congratulate

Opticon s.r.l. Italia

with the project for the Italian Post:

"Electronic Postman" Tracking & tracing letter and parcel delivery

After running different tests of several suppliers and thanks to the effort of our Italian colleagues, the Italian Post has decided to equip their staff with the H19B.

The first roll-out will consist of 15.000 units.

Today, the Financial Times publishes an AIDC/RFID briefing in which Opticon contributed. The article focuses on the developments in the Postal industry and the success of the Postal solutions Opticon introduced in countries worldwide.

You will find the article in the attachment.

The entire briefing can be downloaded from <http://rfidbriefing.aumq.org/rfid2/index.html>
You will find the Opticon article on page 47.
